A CONTINUING MODEL OF SUCCESS

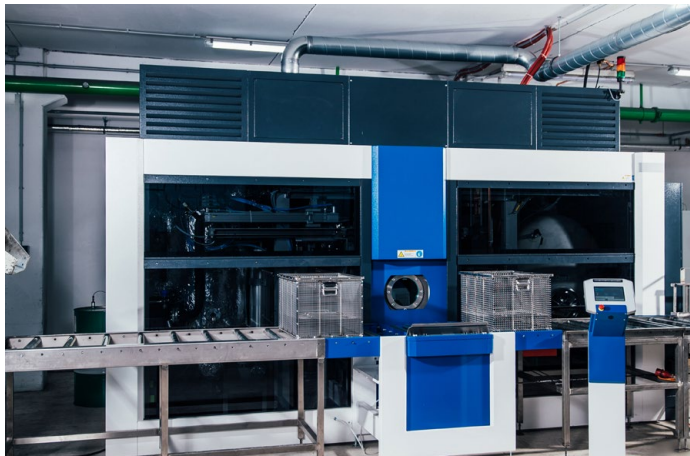

Anyone who has dealt with quality assurance and quality control for two decades knows exactly what's important. When we talk about 'quality' today, it involves more than simply reworking or fixing defects. In addition to actual quality assurance, we're also happy to assist our customers with additional services and offer an full service package.

Be amazed by the variety of our service offers and assure yourself of our comprehensive standards of quality in all areas.

Andreas Wacker

COMPONENT CLEANING

Our cleaning units are state-of-the-art and meet the very highest industrial standards.

Reach your fullest potential with our help.

- Professional water-based and modified alcohol industrial component cleaning
- Spray, flood and ultrasound cleaning
- Degreasing and de-oiling
- Vacuum drying
- Temporary short term or long term corrosion protection
- Wash trials for pilot series
- A range of additional services following the cleaning process
- A focus on the “Fachverband industrielle Teilereinigung e.V. (German Industrial Component Cleaning Association)” quality assurance process management guidelines for component cleaning

ENGINEERING SERVICES

Our portfolio of engineering services includes the following:

- Assembly, implementation and evaluation of test series and endurance tests
- Collaboration of our engineers in your development or engineering team
- Elaboration of specific requirements and solutions
- Support for technical challenges in series production
- Support for customers in classic engineering tasks, quality planning and project work
- Development of products from the pilot series through to series production
- Running technical training sessions and workshops
- Production of specification and requirements sheets

PACKAGING & COMMISSIONING

We're specialised in assembling suitable cardboard packaging and work with bags, outer cartons or special packaging as required.

In this way, cardboard, foil or wooden board packaging materials are assembled into packaging units.

Delivery by our own logistics fleet rounds off the complete package.

QUALITY CONTROL & REWORK-SERVICE

Professional services and products demand equally professional quality controls.

We understand quality assurance as the sum of all measures taken to ensure consistent product quality, e. g.

- Target/actual comparison of your products
- Reworking "just in time"
- 24-hour service
- Professional rectification of defects
- Documentation and test reports
- Firewall and product filter
- End of Line Check

JIG CONSTRUCTION & COMPONENT ASSEMBLY

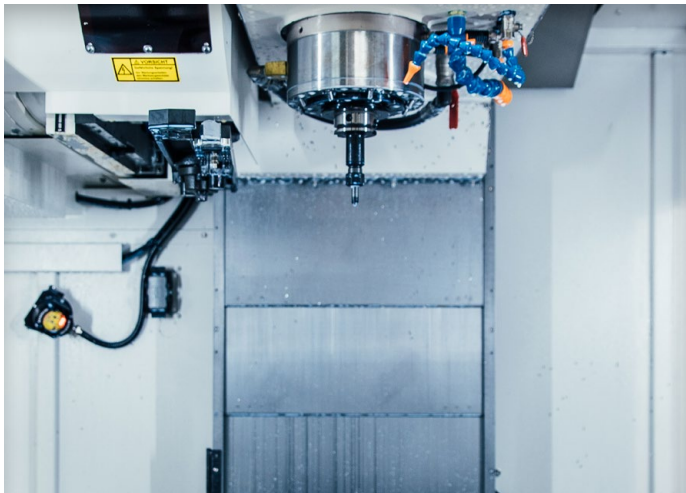

The Wacker company represents many years of experience, technical precision, the latest technology and high flexibility.

For over 20 years we've satisfied our customers from industry and engineering with pioneering solutions.

- Design
- Measuring and testing devices
- Assembly fixtures
- Frame & support elements
- Welding certified to EN 1090-2, EXC2

Our specialists have modern assembly areas equipped with a mechanical workshop at their disposal. In this way, high-quality assemblies are created from your individual parts.

CUSTOM & SERIES PRODUCTION

As specialists in special and series production, we're able to implement your requirements professionally and completely in line with your specifications.

From design in CAD to CNC-5-axis processing through to delivery with our in-house logistics fleet.

- Design
- CAD-CAM programming
- Contract production
- Batch size from 1 piece
- CNC-5-axis milling
- 3D form milling
- Turning
- Creation of measuring reports
- Fast implementation
- Pick-up and delivery service

WE WILL BE AT YOUR SIDE ...

... to help you achieve your goals.
We and our team look forward to your
individual enquiry.
